EDUCATION

New York University

Expected May 2027

Bachelor of Arts: Computer Science and Mathematics | Dean's List (All Academic Years)

GPA: 3.79/4.0

Relevant Coursework: Data Structures, Algorithms, Software Engineering, Operating Systems, Numerical Computing

EXPERIENCE

Betterment | Software Engineering Intern | New York, NY

June 2026 – Present

- Build an automated mutual fund eligibility engine to block ineligible trades, eliminating a gap behind 8 incidents
- Partner with Operations and Trading engineers to encode complex eligibility rules in Trading's production logic
- Automate storage of daily 16,000 fund file into tables, replacing Ops' manual lookups with direct query access

Eagor | Software Engineering Intern | New York, NY

July 2025 – Oct 2025

- Shipped 5+ production features per week in a 4-engineer team, accelerating iteration speed for investor demos
- Built Google Calendar sync system with conflict resolution and local caching, improving reliability of event data
- Improved engagement for 100+ daily users by developing SwiftUI features (toasts, embedded YouTube videos)

NYU IT High Speed Research Network | Researcher | New York, NY

Jan 2025 – May 2025

- Identified Remote TCP data limit of 5,000 bytes, enabling fix that improved capacity by 1,200% to 65,000 bytes
- Created a Python benchmarking suite to test TCP/UDP/WebSocket performance across packet configurations
- Authored two testing reports documenting protocol performance, informing NYU network research decisions

NYU Courant Institute of Mathematical Sciences | Grader | New York, NY

Sept 2025 – Present

- Provide feedback on 100 C programming assignments per month to improve students' core programming skills
- Evaluate student code for efficiency and memory safety to ensure comprehensive adherence to C best practices

Art of Problem Solving | Grader | New York, NY

Oct 2024 – Present

- Assess 1,500+ proofs per year for AIME qualifier, identifying top talent among American high school students
- Partner with a grading team of 10 to standardize rubrics and maintain evaluation quality across all submissions

PROJECTS

FlakeMate | Python, Flask, Docker, HTML/CSS, MongoDB

May 2026

- Developed a containerized event-sharing platform using Flask microservices, MongoDB, and Docker Compose
- Built CI/CD pipelines with GitHub Actions to automate testing, Docker image delivery, and cloud deployment
- Achieved 75% unit test coverage across all containerized application subsystems using automated CI workflows

Places2Be | JavaScript, React Native, Firebase

Oct 2024 – Feb 2025

- Programmed 8 responsive front-end pages using React Native to implement pixel-perfect Figma design outlines
- Configured Google Firebase backend for secure account authentication and realtime comment synchronization

SwipeBeats | Python

July 2025 – Aug 2025

- Engineered a Python tool to group Spotify users' liked songs by genre, enhancing the platform's filtering ability
- Integrated Spotify API with OAuth and realtime audio streaming to enable seamless playlist creation workflows

LEADERSHIP

Greenwich Undergraduate Advisory Council | Director of Comms. | New York, NY

Oct 2024 – May 2025

- Led publicity efforts for up to 10 hall council events per month, increasing student engagement and attendance
- Managed \$7,000 hall council budget, eliminating wasteful spending and reallocating funds to resident amenities

TECHNICAL SKILLS

Languages: Java, Python, Swift, C, C++, HTML/CSS, SQL

Frameworks & Tools: React, React Native, Flask, SwiftUI, Docker, Git, GitHub Actions, MongoDB, Firebase, pytest
